Built for local control.

Ready for enterprise growth.

AccSoft ERP unifies your core business processes in one intelligent platform - helping you manage finance, inventory, purchasing, sales, manufacturing, projects and management reporting with confidence. Built for Sri Lankan businesses, it delivers local compliance, real-time visibility and the flexibility to grow today and tomorrow.

Why businesses choose AccSoft ERP

Core ERP Modules

AccSoft ERP brings together critical business functions in one integrated platform. Our modular design helps you streamline operations, improve accuracy and gain real-time insights.

01

Financial Management

Manage general ledger, accounts payable and receivable, bank reconciliation, budgets and cash flow with ease.

02

Sales & Accounts Receivable

Streamline order management, invoicing, credit control and collections to improve cash flow and customer satisfaction.

03

Purchasing & Payables

Automate procurement, manage vendor accounts, track bills and payments, and optimize spend.

04

Inventory Management

Track stock in real time across locations, manage reorder levels, batches, serials, and reduce stockouts.

05

Production Planning & Engineering

Plan and schedule production, manage BOMs, routings and work orders to boost efficiency and quality.

06

Warehouse Management

Optimize receiving, picking, packing, transfers and cycle counts for greater accuracy.

07

Fixed Assets & Costing

Track fixed assets, depreciation and maintenance. Manage cost centers and product costing for accurate profitability.

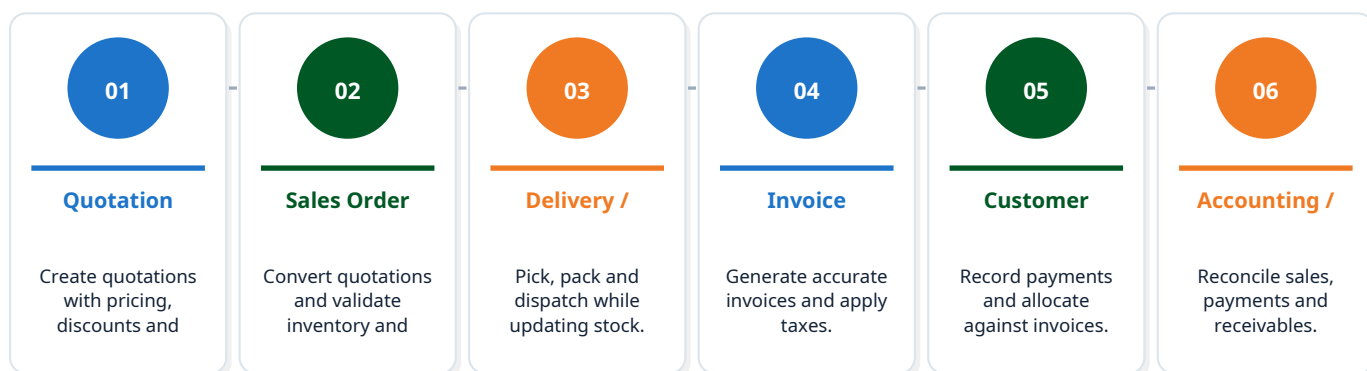

08

Reports & Dashboards

Access real-time reports and dashboards to monitor performance, analyze trends and make smarter decisions.

From quotation to cash collection - with accounting visibility.

AccSoft ERP connects every step of your sales process to accounting in real time - ensuring accuracy, control and complete visibility across your business.

Management reporting for daily decisions

Real-time reports and dashboards give you the insights you need - whenever you need them.

Sales Visibility

Track performance by customer and product.

Order Status

Monitor progress from order to delivery.

Receivables Tracking

Follow outstanding invoices and cash flow.

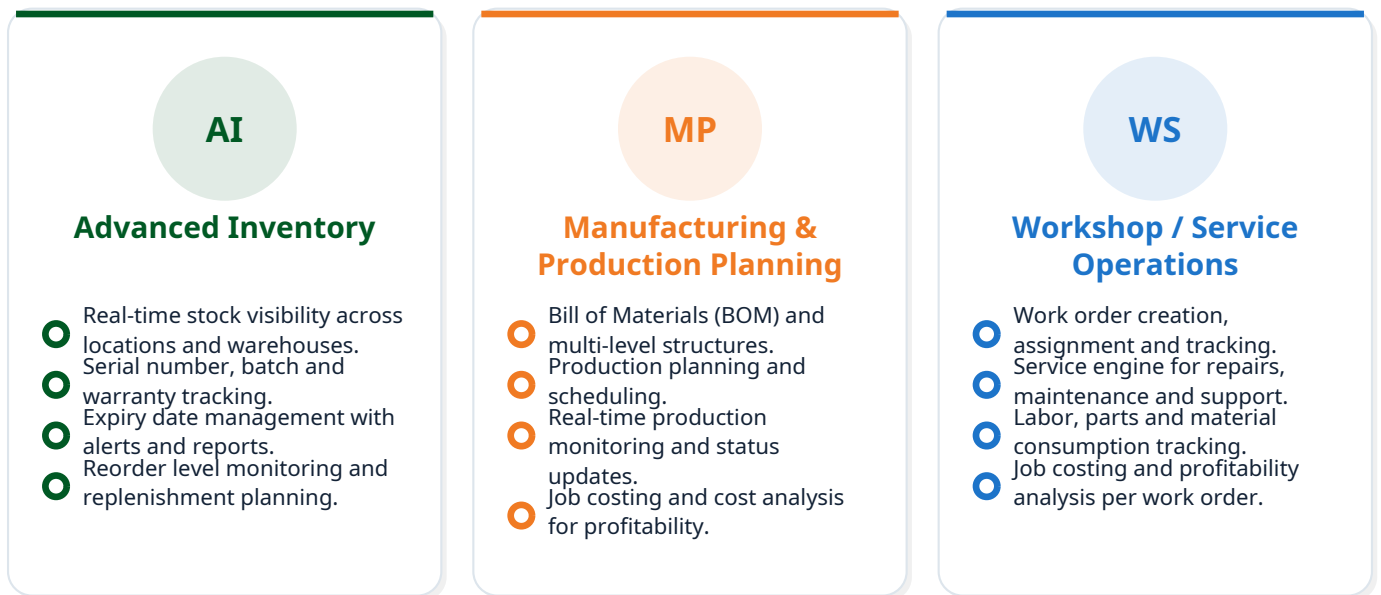

Profitability Insights

Analyze margins, costs and profitability.

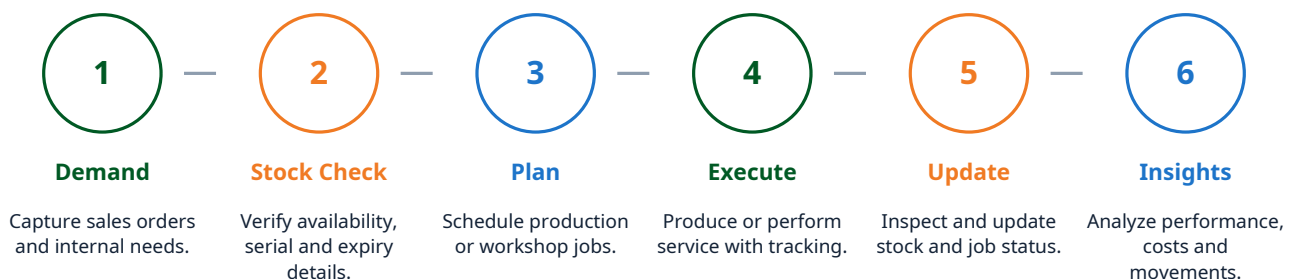

One connected flow. One source of truth. Better control, every step of the way.

Inventory, Production & Workshop Control.

Take full control of your inventory, manufacturing and workshop operations with AccSoft ERP. Gain real-time visibility, track every item and process, and ensure quality, efficiency and profitability at every step.

Stock & Job Control Flow

Advanced Capabilities

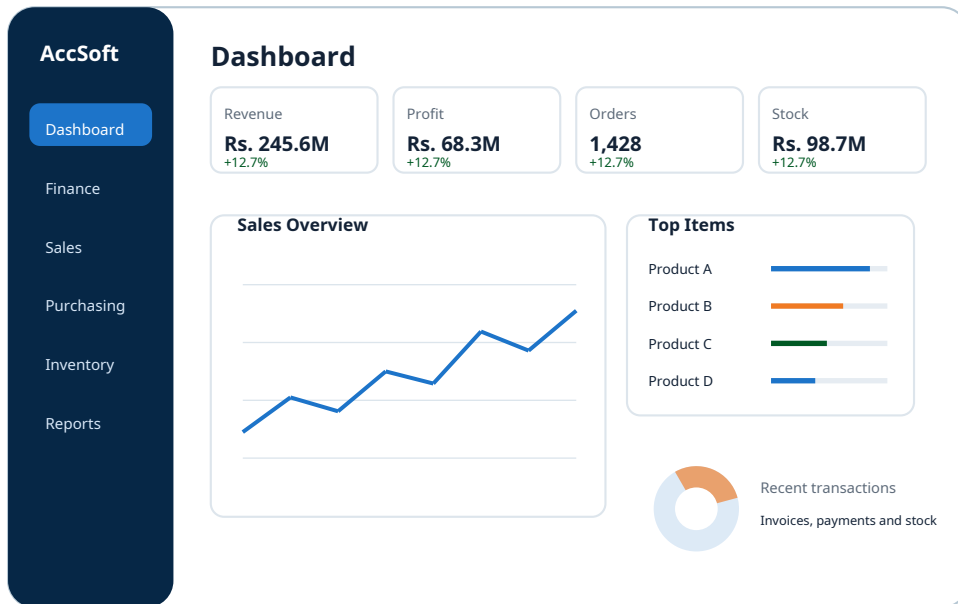

AccSoft ERP is packed with practical features that help Sri Lankan businesses streamline operations, stay secure and grow with confidence.

 Barcodes & Scanning Speed up data capture and reduce manual errors.	 Mobile Sales Force Empower your sales team with real-time access on the go.	 Online Bank Reconciliation Automatically match transactions and reconcile accounts.
 Multi-Location & Branch Control Manage multiple locations from a single centralized system.	 Approval Workflows Set up structured approvals for accountability and control.	 Role-Based Security Restrict access by role and responsibility.
 Audit Trails Track every action with detailed logs for transparency.	 Dashboards & Reports Get real-time insights with customizable reports.	 Import/Export Utilities Easily import and export data with confidence.
 Backup & Support Reliable backups and local support keep operations smooth.		

Powerful Controls. Practical Every Day.

AccSoft ERP combines robust controls with ease of use - helping businesses work smarter, stay compliant and achieve sustainable growth.

Better visibility for management and better accountability for teams.

- Interactive Dashboards**
Get a real-time snapshot of key metrics across departments.
- Data-Driven Decisions**
Transform data into insights and act with confidence.
- Role-Based Access**
Ensure the right information reaches the right people.
- Export & Share**
Export reports and share insights with your team in seconds.

Cash & Sales Overview

Track cash flow, revenue and collections in real time. Monitor trends and balances.

Management Reporting

Generate reports for finance, sales, inventory and purchasing.

Real-Time Stock Data

Monitor stock levels, item movement and reorder needs instantly.

Workflow & Approvals

Automate workflows and approval hierarchies for control.

Insights for better decisions

From daily operations to board-level review, AccSoft ERP gives management complete visibility across the business and helps teams make timely decisions that drive sustainable growth.

Industry Solutions

AccSoft ERP is designed to adapt to the unique needs of every industry. From trading to manufacturing and services, our flexible platform helps you streamline operations, ensure compliance and drive growth.

WT

Wholesale & Trading

Manage suppliers, pricing, stock levels and sales orders efficiently while maintaining healthy margins.

RF

Retail & FMCG

Streamline POS, inventory, pricing and promotions for better customer experiences.

MF

Manufacturing

Plan production, manage BOMs and shop floor operations with control over costs.

EN

Engineering

Handle project costing, resource planning, quality and on-time delivery.

WS

Workshops & Service

Manage job cards, spares, labor, service history and turnaround time.

SI

Service Industries

Simplify contracts, billing, resource allocation and service tracking.

DS

Distribution

Optimize routes, depots and delivery tracking for reduced costs.

PB

Project-Based Businesses

Plan projects, track budgets, resources and progress in real time.

Software, training and support from a team that understands local business.

At AccSoft ERP, we go beyond software. We partner with you at every stage - from discovery to go-live and beyond - so you get lasting value from your investment and the confidence to grow.

A practical ERP journey

Why it matters

Successful ERP adoption depends on more than technology. It depends on the right combination of software, training and ongoing support - working together to help your team adapt, perform and grow with confidence.
